

Crèche parents

This crèche service is not an approved education and care service (does not require a provider and service approval).

Crèche services provide short term care for children while their parents participate in an activity, meeting or other event at the same location.

As the parent, you maintain responsibility for your child. This means that you must:

- remain on the premises while your child attends the crèche
- return immediately to your child if requested to do so by crèche staff.

Please talk to crèche staff if you need more information or have any concerns. We hope you and your child enjoy your crèche experience.
